This is great! You can put a photo in the frame and make cute little captions on the other side with the felt letter board. I love using this for my business to insert a photo of my craft item and use the other side for the price and short description. Lots of possibilities!! It's a good size and definitely a great value!!

Excellent purchase the frame is beautiful. I liked the frame a lot I bought originally for the gimmick of the letter board but I was really surprised how detailed and nice the frame. The packaging was really secure plenty of foam around the frame. Great decoration piece

This is a very special frame. I put a picture of one of my kids and our dog in the frame and some words alongside of it. The letters are quite small - and there are plenty of them too along with emoji's - they attach to the board quite easily. I could see giving this to someone special for a treat. I think \$28.99 is a fair price for this considering how nicely it's made.

Be careful if there are small kids or animals around as the letter pieces are small.
